WINTER

TSL OUTDOOR

GO YOUR OWN WAY...

Go your own way. This isn't just a motto; this is our way of life. This is what drives us, what makes us different. In short, this is our DNA.

Going your own way means creating sports activities which take you out into nature.

More than 30 years ago, we created the snowshoe recreational market by offering our customers smart, high-quality products. A decade later, we launched the Nordic walking market in France, Italy and Spain with a full range of poles bursting with innovations. 5 years after that we developed our Yooner activity so that everybody, fans of skiing or not, can discover new snow sensations and have fun out on the slopes.

Going your own way means producing your products in France and committing to eco-design

We've built our company from the ground up in the heart of the Aravis (Haute-Savoie, France). The mountains are our natural habitat, our passion, our source of inspiration, and our laboratory. We care about sustainable development and we're aware of just how fragile our environment is. This is why we've always manufactured every single one of our snowshoes, sleds and Yooners in France. From the preliminary product design stages, we're always looking to optimize our environmental performance by minimizing our impact (material consumption, transport, use, recycling...). Lastly, by keeping all of our production close to hand we can react to any issue arising from manufacture or customer service because we have full control over the entire production process (from plastic injection to final assembly). Thanks to our industry expertise, modern production tools and innovative manufacturing processes, we've been able to cement our position at the pinnacle of our field.

Going your own way means gaining a reputation for constant innovation.

The taste for innovation lies at the very heart of who we are. It runs through our team of developers, testers, professionals and passionate men and women who live for the mountains and seek excellence above all else. For every one of our products, we invent innovative new concepts and work to perfect high quality products which genuinely meet your needs. We're creators, not followers. This is why we've already filed more than 60 patents around the world and won a number of awards to demonstrate the respect we've earned in our field.

Going your own way means going there together.

Our authenticity, our unique culture and our values have enabled us to forge a close, trusting relationship with you for more than 30 years. Together we share the passion for the mountains, for real fresh air, for great products, for strong emotions and for shared dreams. We'd like to thank you from the bottom of our hearts for putting so much faith in us.

And now? It's up to you to go your own way.

We're delighted to present all of our products to you. They will be the most loyal companions you could ask for, letting you take full advantage of all the joy of the mountains. Use them to explore, discover, feel, breath, escape and wonder. That's our greatest satisfaction: putting you in complete harmony with nature.

Go your own Way...

HYPERFLEX TECHNOLOGY SYMBIOZ

MADE IN
FRANCE

Hyper-flexible and lightweight with an ergonomic binding, the Symbioz adapts to the unevenness of the terrain to give extraordinary traction. The inserts provide elasticity and responsiveness and to offer a feeling of freedom.

REINFORCEMENTS

For the first time, TSL has used a design containing reinforcements each having their function that are essential to the effectiveness of the Hyperflex concept. They support the product's distortion constraints during walking and give the Symbioz its overall qualities: flexibility, rigidity, elasticity and light weight.

CARBON

Carbon reinforcements store energy during the flexing phase and restore it at the end of the stride to increase stride power and reduce effort and vibration. Distortion of the **SYMBIOZ ELITE** frame is progressive, responsive, precise and uniform in both the bending and twisting phases.

TEXALIUM

Texalium reinforcements allow effort to be transmitted evenly across the whole frame. They give the **SYMBIOZ EXPERT** a high level of elasticity for harmonious suppleness and excellent stride absorption.

THERMOPLASTIC

Thermoplastic reinforcements support the **SYMBIOZ HIKER** distortion constraints to provide a natural stride in both the bending and twisting phases.

HYPERflex concept

3 SIZES OF SYMBIOZ

The Symbioz now comes in three sizes (S, M and L) to adapt to everyone's body shape (small and large build) and to the snow in the many different conditions.

S

52,5 x 19 cm / 20,5 x 7,5"

M

59 x 21 cm / 23,5 x 8"

L

69 x 22,5 cm / 27 x 8,5"

Our different prize

TSL OUTDOOR was awarded a prize by the Design Observer from APCI (Agency for the Promotion of Industrial Design), Inosport, Backpacker (USA) and Bref Rhône Alpes Trophée for its Symbioz Elite. The prize award reinforces TSL's determination to progress in order to provide consumers with even more innovations.

TRACTION

NEVER HAS A SNOWSHOE OFFERED SUCH OUTSTANDING GRIP.

Combined with the vertical blades, the stainless steel bidirectional crampons placed under the foot give incredible traction (uphill), excellent grip (downhill) and perfect drift control (incline). The flexible frame follows the shape of the terrain, provides superb stability and complete safety to avoid sudden sliding in powder snow.

FRONT TEETH

The front teeth provide maximum traction on steep slopes.

VERTICAL BLADES

The vertical blades provide superb traction and control on inclines or steep slopes in soft or compact snow.

CLAWS

8 large independent claws in stainless steel for abrasion resistant (inspired by mountaineering crampons) are always located under the support points of the foot for all the shoe sizes, thus avoiding the loss of energy. They provide excellent traction (uphill), traction (downhill) and great sidehill grip (downhill slope) all the time during the trek.

FRONT TIGHTENING

MEMORY LOCK SYSTEM

(TSL Patented)

The system provides efficient tightening and memorizes the front volume of the shoe.

STRAP TIGHTENING

Front classical tightening with strap.

DEVICE WITH PRESET MEMORY

LOCK ADJUSTMENT

(TSL Patented)

Simply press the lock adjustment buttons and slide the heel piece to the desired size and it will be ready for use on all future outings.

The Symbioz' telescopic bindings accentuate the foot movement provided by the frame.

LATERAL ADJUST

(TSL Patented)

Side adjustment system designed to accommodate any width of footwear insuring maximum comfort

BINDINGS / COMFORT

The Symbioz range provides a complete memory system for the shape of the shoe (size and front volume). This gives excellent control of the foot across a wide range of sizes and in all types of situations. Once these pre-adjustments have been made, the snowshoe can be put on easily and quickly before each outing.

HYPERflex
concept

easy ascent

The Easy Ascent heel lift is incorporated into the binding and is activated by simply pushing downward with your pole. Also, during ascents, you will not have any feeling of discomfort under your foot as your weight is spread across the entire heel of the binding

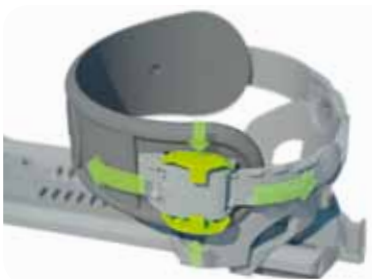

All Symbioz snowshoes are equipped with the Sound and shock absorbing System (TSL Patented).

BACK TIGHTENING

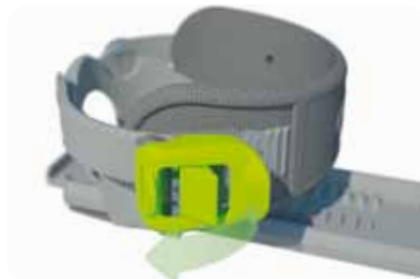

PRESET ANKLE

It allows to adjust the comfort PAD on the shoe.

BUCKLE TIGHTENING

Our bindings include a ratcheting buckle system.

COMFORT PAD

This system relieves any discomfort from tightening the straps.

expert

SYMBIOZ elite

The Symbioz ELITE has the top of TSL technologies : Hyperflex Concept, carbon reinforcements for excellent elasticity and responsiveness, exceptional grip and flexible binding with the «Global Memory binding» Concept. It is intended for enthusiastic snowshoers who wish for the best to go in all kinds of terrain and snow.

running

SYMBIOZ racing

The Symbioz Racing has been specially designed for high-speed snowshoe enthusiasts. Their extreme flexibility offers a completely natural-feeling stride, fantastic weight transfer and unparalleled lightness (320g/0.70lbs per foot), making these snowshoes a natural extension of your body.

HYPERflex
concept

NATURAL STRIDE

The Hyperflex Concept frame gives you a completely natural foot-strike and propulsion, ensuring that your stride is as natural as possible for maximum grip on both your snowshoes and the snow. Thanks to its shape memory, these snowshoes store energy when flexed and release it at the end of your stride.

NEW
640g
the pair !

	53,8 x 20,4 cm (21,1 x 8")
	320g x2 (0,70 lbs x2)
	40kg > 100kg (90 > 220 lbs)
	36 > 47 (6 women > 13 men)

COMFORT AND EASE

Tighten and loosen your snowshoes in a flash with pre-set adjustments which stores the memory of your foot: pre-adjust the length, the toe and the heel + the tightening strap and slip them on effortlessly.

TRACTION

Extreme grip with 4 studs and a traction bar (TSL Patented) under the heel which can be adjusted for any size of foot.

This model follows the European and American regulatory standards for competitive snowshoe racing.

BINDINGS

GLOBAL MEMORY BINDING.

TSL is the only brand of snowshoes to provide a complete memory of the shape of the shoe (size and front volume). This gives excellent control of the foot across a wide range of sizes and in all types of situations. Once these pre-adjustments have been made, the snowshoe can be put on easily and quickly before each outing.

DEVICE WITH PRESET MEMORY

LOCK ADJUSTMENT (TSL Patented)

Simply press the lock adjustment buttons and slide the heel piece to the desired size and it will be ready for use on all future outings.

DEVICE WITHOUT PRESET MEMORY

RAPID ADJUSTMENT

Open the heel piece to the maximum length and slide forward to be in contact with your heel.

FRONT TIGHTENING

MEMORY LOCK SYSTEM (TSL Patented)

The system provides efficient tightening and memorizes the front volume of the shoe.

STRAP TIGHTENING

Front classical tightening with strap.

LATERAL ADJUST (TSL Patented)

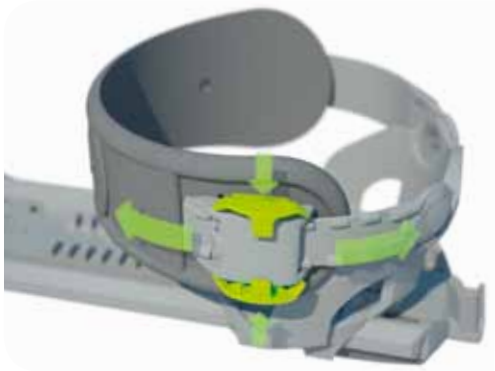

Side adjustment system designed to accommodate any width of footwear insuring maximum comfort

BACK TIGHTENING

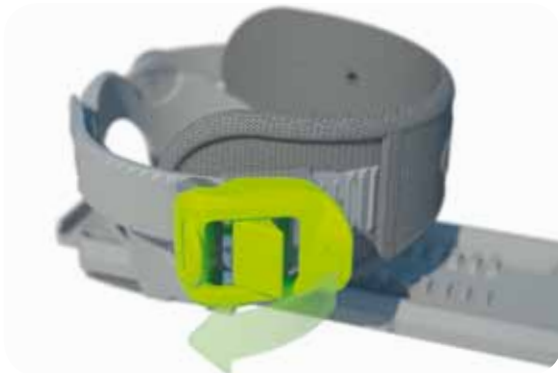

PRESET ANKLE

It allows to adjust the comfort PAD on the shoe.

BUCKLE TIGHTENING

Our bindings include a ratcheting buckle system.

COMFORT PAD

This system relieves any discomfort from tightening the straps.

HEEL LIFTS

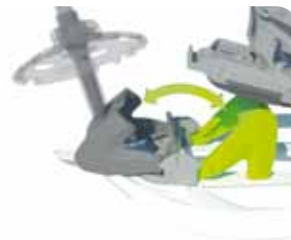

Our heel lifts (with 12° of lift) can be adapted to all shoe sizes and are the only ones on the market always to be situated under the heel, so there is no unpleasant feeling under the foot that turns into pain over time, and no discomfort during ascents.

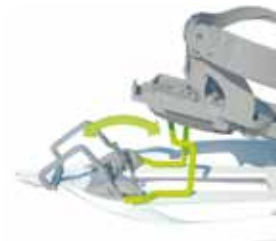

Going uphill, the device lifts the heel. Going Downhill, the back of the binding goes under the deck in order to keep the foot flat, preventing the foot from jutting out at the front of the shoe.

easy ascent

easy-up

CLASSIC

All TSL snowshoes have a Sound and shock absorbing System (TSL Patented).

SHOES & GAITERS

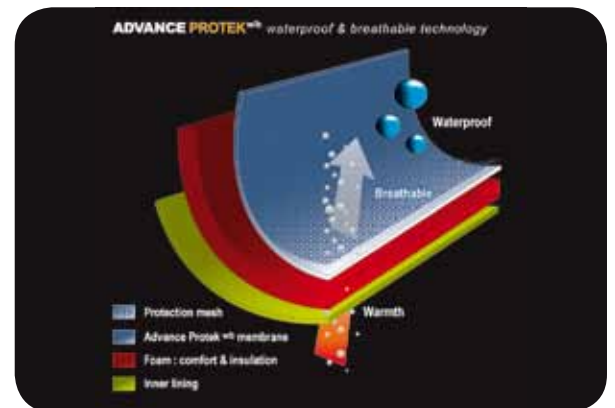

TECHNOLOGY

Everything that you need for winter and summer conditions is incorporated into the TSL shoe concept: heat, watertight construction, grip, breathability, support...
Now all you need are the right conditions!

Last construction

Assembling the shoes on a last allows for greater comfort, as the inside of the shoe perfectly molds to the shape of the foot. What's more, this type of construction is much more solid and durable than any other kind. That's why TSL has chosen last construction.

WE DO IT SO

Because the mountain is a beautiful playground, TSL offers a full range of sliding products that are fun, efficient, durable and manufactured entirely in France. Everyone (children or adults) can find fun on sleds or on the ski (Yooner) slopes.

Guaranteed Fun!

**MADE IN
FRANCE**

fun

YOONER ENDURO

The Yooner Enduro has all the qualities that have made the Yooner such a success (comfort, suspension, claw brake) but with some major added advantages: you'll love its carved ski, suitable for all types of snow, its lightness, design.

61,5 x 99 x 24,5 cm
24 x 39 x 9,5"

3 kg
6,60 lbs

fun

YOONER

This Yooner offers comfort, fun and safety. The seat is mounted on a suspension system that acts as a shock-absorber on bumpy slopes. The stainless steel ski provides gliding sensations similar to skiing (edging). Finally, the Yooner is fitted with a "claw brake" for safety. Simply pull the handle towards you to stop.

60 x 73 x 26 cm
23,5 x 28,7 x 10"

3,5 kg
7,70 lbs

Seated 20cm above the ground, like a snow kart, the Yooner is a true invitation to ski. The Yooner's key advantage is that it's easy to handle (after just one descent), great fun and provides immediate excitement

The Yooner is for all ages and anyone who wants to share in an easy, fun activity. It's also a way of bringing skiers and non-skiers together Adding more variety to life in the snow!

Already more than 60 ski resorts in France allow the Yooner on the slopes! Your ski resorts does not yet allow the Yooner and you want to offer it to your customers? Do not hesitate to contact our Promotion Service (tsl@tsloutdoor.com) for France or the TSL distributor of your country in order to help you.

For a list of resorts that authorize the Yooner, log on to :

NORRDIC WALKING TACTIL SEERIES

THE MAGIC MAGNETIC STRAP CONCEPT

With its magical, magnetic, unique and easy to use technology, attaching the wrist strap to the pole is child's play. Don't worry about aiming at the pole; it'll come straight to you. While you're walking it is safely locked into place, so there's no danger of it slipping from your grasp. Finally, removing it is a breeze; just press the button and let go.

The ergonomic wrist strap gives you a truly light, comfortable and accurate grip. You'll love the comfortable, breathable fabric and the reinforced sides, giving you incredible support and pinpoint accuracy.

CROSSOVER PAD CONCEPT

(TSL patent)

Say goodbye to pointed tips and removable PADS to attach and detach while you walk; the Crossover Pad adapts to the obstacles you face throughout your walk to provide extraordinary traction and support, whatever the terrain. 8 multi-crampons adjust their shape upon contact with the ground, hugging the surface and giving you the grip you need.

TACTIL series

n o r d i c w a l k i n g

NORDIC WALKING REVOLUTION...

**A magical solution:
with zero constraints and a fully tactile pole,
you're guaranteed 100% pure pleasure!**

Tactil Generation removes all the constraints of Nordic walking poles: no tip changes to adapt to the terrain.

No permanent attachment to your hand.

Tactile, is now the pole to adapt to the environment as well as user movements

We are proud to have given life to the simplest and most technical poles on the market.

expert

TACTIL C100

This 100% Carbon, great resistance and vibration absorption, resistant and vibration-absorbing, is packed with the most advanced technology on the market: Crossover Pad and Magic Strap Concept. Reserved for more demanding users.

CARBON | 105 > 135 cm / 41 > 53" | Ø 16
100% | 140g x2 (115cm) / 0,31lbs x2 (45")

Bi-material Cork handle / Magic Strap Magnetic Concept / 1 part 100% Carbon / Crossover Pads / Made in France

expert

TACTIL C70

The same features as the Tactil C100 except for one detail: its composition 70% carbon for a good compromise rigidity / vibration absorption. Recommended for regular walkers who are looking for high technology and comfort.

CARBON | 105 > 135 cm / 41 > 53" | Ø 16
70% | 150g x2 (115cm) / 0,33lbs x2 (45")

Bi-material Cork handle / Magic Strap Magnetic Concept / 1 part 70% Carbon / Crossover Pads / Made In France

NORDIC WALKING STANDARD SERIES

THE IMPORTANCE OF CARBON:

One-piece or telescopic, depending on the model, the pole is made of either fibreglass, aluminium or carbon.

The higher the percentage of carbon, the lighter and more rigid the pole is and the less it vibrates.

DETACHABLE WRIST-STRAPS

Simple, practical and effective, these two glove like systems let you detach your hiking poles with a single click. They are perfect for when you need to warm up, stretch out or look for something in your backpack.

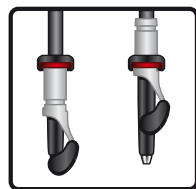

FIT NORDIC CLICK

NORDIC Profi Strap

All TSL Nordic walking poles have a Tungsten tip giving excellent grip and optimising ground support.

PUSH & PULL PAD

Easy and efficient system, allowing a pole tip to be changed to fit ground conditions ("Rubber tip" on asphalt - tip on paths and muddy grounds).

The PAD remains attached to the pole, even when in "path" mode (tip).

Length selection guide

1,48 m - 1,55 m	100 cm
1,55 m - 1,62 m	105 cm
1,62 m - 1,70 m	110 cm
1,70 m - 1,77 m	115 cm
1,77 m - 1,85 m	120 cm
1,85 m - 1,92 m	125 cm
1,92 m - 2 m	130 cm

expert

GYMNA STICK

Resistant and irreproachable vibration absorption, thanks to its 100% carbon fiber construction. The Gymna Stick is also fitted with a Push & Pull pad and a removable strap. Recommended for Nordic walking enthusiasts.

CARBON 100% | 105 > 130 cm / 41 > 51" | Ø 16
130g x2 (115cm) / 0,28lbs x2 (45")

Cork handle / Removable Nordic Profi Strap / 1 part 100% carbon / Straight Tungsten tip / Push & Pull Pads / optional accessories (P49) : baskets Ø130, Ø95, Ø55 / Made In Europe.

expert

ACOO STICK

The Acoo Stick model, 100% carbon, is fitted with an a removable strap and a beveled tip for a great traction. A safe bet!

CARBON 100% | 105 > 130 cm / 41 > 51" | Ø 16
125g x2 (115cm) / 0,27lbs x2 (45")

Cork handle / Removable Nordic Profi Strap / 1 part 100% carbon / Beveled Tungsten tip / Nordic Sport Pads / Made In Europe.

walker

ARTI STICK

Good compromise between rigidity / vibration absorption for this model made of 50% carbon. It is fitted with a Push & Pull PAD and a removable strap. A companion full options.

CARBON 50% | 105 > 130 cm / 41 > 51" | Ø 16
160g x2 (115cm) / 0,35lbs x2 (45")

EVA foam handle / Removable Nordic Profi Strap / 1 part 50% carbon / Straight Tungsten tip / Push & Pull Pads / optional accessories (P49) : baskets Ø130, Ø95, Ø55 / Made In Europe.

walker

STYLI STICK

The curves on this pole function as a highly effective shock absorption system (equivalent to a 50% carbon pole). It is equipped with a removable grip.

ALUMINIUM 7075 | 105 > 130 cm / 41 > 51" | Ø 16
205g x2 (115cm) / 0,45lbs x2 (45")

EVA foam handle / Removable Nordic Profi Strap / 1 part 100% Aluminium 7075 / Beveled Tungsten tip / Nordic Sport Pads / Made In Europe.

- 1 1st curve: a better angle for your wrist. This position eases the pressure on your wrist and increases blood circulation.
- 2 2nd curve: gives you more power and better propulsion, reducing vibrations along the length of the pole.
- 3 3rd curve: the tip hits the ground at a right angle, minimizing pole slips.

FLASKS

With their double-skin stainless steel construction, these unbreakable thermos flasks maintain the temperature of both hot and cold liquids for 24 hours. The stopper, with its silicone seal and partial push-button opening, reduces heat loss.

The 350 ml & 500 ml models come with one beaker and the 750 & 1000 ml with 2 beakers, because, at TSL, we like to share.
