A part of you since 1891

Anchored in a long tradition of craftsmanship, our factory was founded in Mora 1891. It successfully combined the benefits of hand-forged blades and industrial manufacturing. The result was a knife with a grip-friendly handle with a very sharp and robust blade.

Today, the knife from Mora is well known for its high quality and is also recognized as a national symbol of Sweden. We take pride in our heritage and that every one of our knives are made in Mora, Sweden. Just like it has always been and always will be.

Morakniv Companion Spark is a reliable companion that is designed to perform in any weather condition. It's a knife you can clean fish, make feather sticks in wood and light a fire with. The 2,5 mm durable blade is made of Swedish stainless steel, which makes it easy to maintain and improves the edge retention. The blade has a Scandi grind profile that makes it easy to keep sharp and the spine of the blade is ground to a 90 degrees angle making it compatible with the integrated fire starter in the handle. In that way the heat from a campfire is always at hand, making your Morakniv a part of your sparkling adventure.

Features

Hole

The holes in the handle make the knife lighter.

Polymer

The polymer is made of TPE and provides a grip-friendly handle that allows you to work with power and precision.

Scandi grind

The knife blade is grinded with a Scandi grind which makes it easy to keep sharp.

Companion design

The design of the knife follows the Companion-series with an ergonomic handle and with a $\frac{3}{4}$ stick tang that ensures a strong, stable and powerful knife that becomes a natural part of your daily work.

Ground spine

The spine of the blade is ground to a 90 degrees angle, making it compatible with the integrated fire starter in the handle. Fire away!

Steel

The blade is 2,5 mm thick and 104 mm long. It is made of 12C27 stainless steel that is treated to the highest quality in our own factory according to our Steel Grade Mora/SGM® Standard.

Sheath

The polymer sheath has a practical belt clip for attaching the knife to a rucksack or a belt. It also has a drain hole in the bottom where water can pass through.

Fire starter

The fire starter is of the highest quality made to perform in any weather condition.

Reflective cord

Companion Spark is equipped with a reflective cord for the fire starter which reduces the risk of misplacing it in the dark.

Companion Spark

Companion Spark is our latest sparkling novelty – designed to light the spark to your outdoor adventure. With a high quality fire starter integrated in the handle, the heat from a campfire is always at hand.

Burst from Companion, one of our most popular knives, Spark is a reliable companion that preforms great in any wheather condition. The durable blade is made of Swedish stainless steel, which makes it easy to maintain and with better edge retention. It has a soft friction grip handle made of TPE rubber, which makes the grip safer and more steady to work with. The polymer knife sheath has a practical belt clip for attaching the knife to a rucksack or a belt. Companion Spark is also equipped with a reflective cord for the fire starter which reduces the risk of misplacing it.
