

14557 - Mörkret (S)

Data Sheet Created: 18-08-2026

Mörkret (S) is a knife with a full-tang blade in Swedish stainless steel. Developed for demanding use in outdoor, bushcraft, and survival settings – a 153,5 mm long, 4.2 mm thick blade designed for batoning, carving, and building shelters in the field.

The 153.5 mm long, 4.2 mm thick blade is crafted from Swedish stainless 14C28N steel, hardened and cryogenically treated for a hardness of 58 HRC and excellent edge retention. The edge runs all the way into the handle, allowing you to work closer to the material with improved control and power transfer. The new High Flat grind with a secondary bevel provides more steel behind the edge for added strength and durability during tough tasks.

This knife is made in Mora, Sweden.
