

# RAYA LITE

Art. no. 74487

Color:   

Durable, light, and efficient. The RAYA Lite is the only ice screw on the market with a replaceable steel tip. If the tip is damaged or too much material has been ground away when sharpening the ice screw, the shaft can still be used, just with a new tip—protecting both the environment and your wallet. The ice screw furthermore impresses with minimum screw-in resistance. This is achieved through a sophisticated combination of the wall thickness, the thread geometry, and the three-pronged tip. With the medium screw weighing just 70 grams, the RAYA Lite is the lightest ice screw on the market, minimizing the load on your climbing harness. Instead of conventional packaging, each ice screw comes in a robust tube bag. The individual bags can be connected together by VCR for flexible and compact storage and transportation. This reduces packaging waste and avoids additional costs.

## Features

- Replaceable steel tip with three prongs for durability reduces waste and costs
- Lightest ice screw on the market, available in three sizes
- Crank and entire shaft color coded for simple differentiation
- Lowest screw-in resistance on the market for efficiency when ice climbing
- Conically shaped shaft interior makes it easier to remove the ice core after unscrewing
- Robust tarpaulin packaging with a color-coded loop acts as a practical bag for storage and transportation

Size	Weight
12 cm	65 g
15 cm	70 g
18 cm	77 g

## Technical information

Certification	EN568
Material	Aluminium/Steel
