

NEW

Next-level Sordin Supreme™ Pro-X family

Four new audio profiles

Audio excellence made Sordin Supreme legendary. The natural reproduction of ambient sound, with perfect directional sensitivity. The HiFi-like sound quality. Now: The next chapter – four new audio profiles, allowing you to adapt your sound experience to your task at hand. Or simply to your current mood.

HUNTING

Hunting is the main audio profile for general purposes. The sound image is optimized for a normal hunting day, balancing clear ambient sound such as speech with comfortable low-noise audio.

SHOOTING

Shooting is a comfort profile with lower gain and a narrower audible frequency spectrum. Perfect when normal situational awareness is sufficient, e.g. in shooting training at the range.

FOCUS

Focus is your full-alert profile. It features high amplification and a wider frequency spectrum for highest situational awareness. Use this audio profile e.g. in the hunting tower to sharpen your senses before your shot.

COMMS

In Comms, ambient sound is deactivated and your hearing protector uses passive protection only. However, the 3.5-mm AUX input is active allowing for clear communication even in noisy environments.

Sordin Hear2 is Sordin's next-generation audio system, integrated in the electronic Sordin Supreme family's premium models Sordin Supreme Pro-X and Pro-X LED.
